MNNIT ALLAHABAD

CLUBS & COMMITTEES

Club directory, activity areas, selection approaches and joining guidance

SELECTION NOTE: The institute publishes a Student Activity Centre (SAC) directory. Club membership and organiser recruitment rules can change and may not be fully published. Where a specific official criterion was unavailable, this guide labels the process as a typical example—not an official rule.

Prepared for a college-information chatbot / retrieval-augmented generation (RAG) knowledge base.

1. How student activities are organised

MNNIT's Student Activity Centre (SAC) facilitates technical, cultural, sports, personality-development, community and other activities. The official SAC site says activities are managed by students under the guidance of the President of SAC and faculty in-charges/coordinators and committees. The official directory groups clubs into technical, sports, cultural and initiatives.

Important distinction: a club is usually a student community focused on a domain; a committee or organising team may coordinate a specific function or event. Names, reporting lines and selection processes should be checked in the current SAC notice.

2. Technical clubs

Club	What it does	Good fit for
Computer Coding Club	Coding events and regular classes/learning activities in computer science	Programming, DSA, competitive coding, software skills
Robotics Club	Builds robots for learning, projects and competitions	Electronics, embedded systems, mechanical design, control, coding
Aero Club	Aeroscience projects, learning and competitions	Aeromodelling, design, flight principles, building
Astro Club	Astronomy-related learning and projects	Space, astronomy, observation, science outreach

Possible selection methods (confirm with each club)

Technical clubs may use an interest form, introductory session, basic quiz, practical task, project discussion or interview. Beginners may be welcome; some project teams may select members based on demonstrated skills and availability. These are common patterns, not confirmed universal MNNIT rules.

3. Cultural and literary clubs

Club	What it does	Ways to contribute
Literary Club	Promotes literature, discussion, expression and literary activities	Writing, debating, speaking, editing, quiz, organising
Quintessence	Dramatics activities including stage and informal performance formats	Acting, writing, direction, production, music, backstage
Srijan	Annual magazine/publication platform for student and alumni expression	Articles, poetry, editing, illustration, design
Alchemy — Dramatics Club	Theatre and performance; develops acting, writing and directing talent	Acting, scriptwriting, direction, stage, props, production

Selection may involve auditions, writing samples, performance tasks, portfolio review, workshops or an informal conversation. Non-performing roles such as writing, design, photography, props and logistics can also be valuable; check each club's announcement.

4. Sports clubs and teams

Club / activity	What it does	Likely selection route (verify)
Cricket Club / Elite MNNIT Cricket Team	Practice, represent the institute and compete in tournaments	Trials, fitness, skill assessment, practice attendance
Chess Club	Promotes chess and organises play/events	Open participation, rating/skill assessment for competitive teams
Table Tennis Club	Indoor table-tennis practice and competition	Trials or skill-based team selection
Lawn Tennis Club	College tennis team and tournaments	Court trials, skill and fitness assessment
Kabaddi Club	Team sport, regular practice and tournaments	Trials, fitness, teamwork and attendance
Skating Club	Skating practice and related activities	Skill/experience assessment may apply
Basketball Club	Basketball practice, competition and team development	Trials, fitness, skill and teamwork
Lifting Club of MNNIT	Strength sports, weightlifting, powerlifting and bodybuilding community	Safety orientation, training commitment; competition standards vary
Football Club / MNNIT FC	Institute football team and year-round training	Trials, fitness, technical skill and team discipline
Athletics & Gym activities	Track and field, fitness and gym-related activities	Event-specific registration or trials

Sports teams may be more selective than recreational clubs because competition rosters are limited. Ask about beginner practice, equipment, coaching, injury prevention and attendance expectations before committing.

5. Initiatives and student-development groups

Initiative	Purpose	Potential contribution
MNNIT Alumni Association	Connects alumni and current students	Alumni outreach, events, communications, mentoring
E-Cell	Entrepreneurship, innovation and startup community	Startup events, outreach, sponsorship, content, operations
Student Mentorship Program (SMP)	Supports senior–junior interaction, mentoring and student guidance	Mentoring, peer support, coordination, communications
Enactus MNNIT Allahabad	Student-led social entrepreneurship and community-oriented innovation	Project work, field engagement, research, partnerships, operations

Joining routes vary. Initiatives may recruit through applications, group discussions, interviews, task-based rounds or open volunteer calls. For mentorship roles, expect emphasis on reliability, communication and appropriate boundaries; never claim an official rubric unless published.

6. Committees and activity administration

The SAC structure includes faculty in-charges/coordinators and committees for activity areas. The official SAC website lists faculty-led areas such as technological activities, cultural activities, sports (indoor and outdoor), literary and personality development, Indian classical activities, athletics and gym activities, yoga and MoE/MHRD activities.

Administrative / activity area	Typical responsibility
SAC leadership and faculty in-charges	Oversight, coordination, approvals, guidance and activity support
Technical activities	Coordinate technical clubs, workshops and technical-event activity
Cultural activities	Coordinate cultural clubs, performances and cultural programming
Sports (indoor and outdoor)	Coordinate sports activities, facilities, training and competitions
Literary & personality development	Support speaking, writing, debate and related development activities

Administrative / activity area	Typical responsibility
Athletic & gym activities	Coordinate athletics and fitness-related activities
Yoga / Indian classical activities	Support practice sessions and relevant programmes
Event organising teams	May handle logistics, hospitality, sponsorship, publicity, design, stage, registration and operations for a specific event

This is a functional explanation of the areas, not a complete official committee constitution. Exact committee titles, members, powers and recruitment rules should be sourced from the latest SAC/institute documents.

7. How selections commonly work

A typical recruitment cycle can include: (1) announcement and application form; (2) orientation or open meeting; (3) screening based on interest/availability; (4) audition, test, interview or task if relevant; (5) trial period or onboarding; (6) final team allocation. This sequence is illustrative and is not a universal MNNIT rule.

What selectors may value

- Technical groups: curiosity, fundamentals, learning ability, project contribution and teamwork.
- Cultural groups: creativity, consistency, performance or production skills and collaboration.
- Sports: skill, fitness, discipline, practice attendance and sportsmanship.
- Organising committees: reliability, communication, time management, problem-solving and execution.
- Social-impact initiatives: empathy, initiative, research, field work and responsible community engagement.

How to improve your chances

- Attend the official orientation and read the application carefully.
- Prepare one or two examples showing interest or prior work; beginners can explain what they want to learn.
- For technical clubs, bring a small project or solve a basic task if requested.
- For cultural clubs, prepare a short audition piece, writing sample or portfolio if appropriate.
- For sports, ask about trials and attend practice consistently.
- Be honest about your schedule; clubs value dependable members.

8. Choosing the right club

Your goal	Good starting point
Improve coding and software skills	Computer Coding Club; relevant hackathons and technical events
Build physical prototypes	Robotics Club or Aero Club
Explore astronomy	Astro Club
Perform or work in theatre	Quintessence or Alchemy
Write, debate or publish	Literary Club or Srijan
Compete in a sport	Relevant SAC sports club and team trials
Explore startups	E-Cell
Work on social innovation	Enactus
Help juniors / build peer support	Student Mentorship Program
Meet alumni and support networking	MNNIT Alumni Association

A student does not need to join every club. Start with one main commitment and one optional activity, then reassess after understanding the workload.

9. Frequently asked questions

Q: Is there one common selection test for all clubs?
A: No common test is established by the sources reviewed. Each club or activity may have its own recruitment or participation process.

Q: Can a first-year student join a technical club without experience?
A: Often introductory activities are suitable for beginners, but specific project teams may require skills. Check the current notice and ask whether beginner onboarding is available.

Q: Are sports clubs open to everyone?
A: Recreational participation and competitive team selection may differ. Ask the club about open sessions, trials, fitness requirements and equipment.

Q: How do I find current recruitment dates?
A: Check SAC announcements, the official club page, institute notices and the club's current official communication channels.

Q: What is the difference between joining a club and joining its organising committee?
A: Club membership usually means participating in that domain; an organising role may involve planning, coordination and delivery of activities. The structure differs by club.

10. Official references and ingestion guidance

- Student Activity Centre: https://sac.mnnit.ac.in/
- SAC clubs directory: https://sac.mnnit.ac.in/clubs
- Main MNNIT website: https://mnnit.ac.in/
- TPO Placement Brochure 2024 (includes student activities such as Avishkar, Culrav and Hack36): https://tpo.mnnit.ac.in/tnp/downloads/Placement%20Brochure%20MNNIT-Allahabad_2024.pdf

For RAG: tag each entry with club_name, category, purpose, membership_process, selection_criteria, official_notice_url and last_verified_date. If selection criteria are not published, answer: “The current official selection criteria are not listed in the sources I have; check the latest club/SAC announcement.” Do not turn illustrative selection examples into asserted facts.
