MNNIT ALLAHABAD

FESTS & CAMPUS EVENTS

Annual festivals, recurring activities, likely timing and what students can expect

TIMING NOTE: Festival dates can shift by academic calendar, examinations, venue availability and organisers. The months below are typical planning windows, not confirmed future dates. The 2025 Culrav–Avishkar website listed dates in December; check the current official event pages for each edition.

Prepared for a college-information chatbot / retrieval-augmented generation (RAG) knowledge base.

1. Campus events at a glance

MNNIT Allahabad has technical, cultural, entrepreneurial, sports and student-development activities. Large flagship events attract participants from other colleges, while clubs and departments conduct smaller workshops, competitions and performances through the year.

Event	Domain	Usual / observed timing	What it is
Avishkar	Technical festival	Often late in the calendar year; 2025 site listed 7–9 December	Technical competitions, coding, robotics, design, engineering and innovation activities.
Culrav	Cultural festival	Often near Avishkar; 2025 site listed 10–12 December	Music, dance, drama, fashion, arts, literary, photography and cultural nights.
Annual Athletic Meet	Sports	Academic-year dependent	Track and field and other athletic competitions; dates announced by institute.
Josh	Sports / student event	Edition-specific	A named institute activity listed by the Student Activity Centre; confirm current format and dates.
Hack36	Hackathon / technology	Edition-specific, often announced separately	Intensive software-building event for teams; check official registration and eligibility.
Udbhav	Entrepreneurship	Edition-specific; 2026 edition reported in early April	Entrepreneurship and startup-focused talks, networking and innovation activities.

2. Avishkar — the technical festival

Avishkar is MNNIT's flagship technical event. It gives students a platform to test engineering, programming, design and problem-solving skills. Exact event categories and rules change each edition; past examples have included programming contests, robotics, hardware/software design and paper presentations.

Who should attend?

Students interested in coding, robotics, electronics, product building, engineering design, research presentations and technical competitions. Beginners can look for workshops or open-entry events; advanced competitions may require prior preparation.

How to prepare

- Follow the current official event website and social channels.
- Read each event's rules, team-size limits, deadlines and hardware/software requirements.
- Prepare a laptop, development environment, identification and any permitted components.
- For team competitions, decide roles and test the demo before arrival.

3. Culrav — the cultural festival

Culrav is the flagship cultural festival, with events spanning music, dance, dramatics, literary activities, art, photography, film-making, fashion and informal competitions. A festival edition may include headline performances or a “pronite”; performers, sponsorships and schedule vary.

Who should attend?

Performers, artists, organisers, photographers, writers, dancers, musicians and students who enjoy large campus gatherings. Participation may be as a competitor, volunteer, club member or audience attendee.

4. Hack36 — hackathon

Hack36 is a software-development hackathon associated with MNNIT. It typically centres on teams building a working prototype under a time limit. The event may include problem statements, mentoring, judging, sponsor tracks or prizes; details are edition-specific.

Practical checklist

• Form a team and review eligibility and team-size rules.
• Select a feasible problem and prepare a small technical plan.
• Use version control and keep a working baseline early.
• Ensure APIs, datasets and third-party assets comply with the rules.
• Prepare a clear demo, README and short pitch.

5. Udbhav — entrepreneurship and innovation

Udbhav is an entrepreneurship-oriented event reported as being organised under the institute's Innovation Council. The 2026 edition was described in news coverage as a two-day event bringing together students, founders, alumni and industry speakers. It is useful for startup exposure, founder stories, networking and learning about innovation support.

Possible activities include talks, panels, startup discussions, networking and cultural programming. Do not assume a specific speaker, prize, registration fee or date without checking the current edition's announcement.

6. Annual Athletic Meet and sports events

The institute's Student Activity Centre (SAC) supports athletics, indoor and outdoor sports, yoga and other student activities. The Annual Athletic Meet is a major sports event listed by SAC. Individual teams and clubs also practise and may represent MNNIT in Inter-NIT or inter-college tournaments.

Students should watch SAC notices for registration, trials, practice schedules, event categories, medical/fitness requirements and venue updates. For team selection, attendance at trials and regular practice may matter.

7. Yearly event calendar (planning guide)

Period	What may happen	Confidence
July–August	New academic-year club recruitment, orientation, introductory workshops	Typical campus pattern; confirm notices
September–November	Department and club events, coding contests, workshops, sports trials	Varies by organiser
Late year (e.g., December in 2025)	Avishkar and Culrav; major technical and cultural programming	2025 dates observed; not a fixed annual promise
January–March	Club activities, sports competitions, institute events, hackathons depending on edition	Varies by organiser
April (2026 reported)	Udbhav 3.0 entrepreneurship festival	2026 edition reported; future dates unconfirmed
Throughout the year	SAC club sessions, team practice, talks and student initiatives	Ongoing but schedule changes

Treat this as a seasonal guide, not an official calendar. If the chatbot is asked “When is Culrav this year?”, it should retrieve the current edition's announcement instead of repeating a historical date.

8. How to participate or volunteer

1) Follow official institute, SAC and event websites. 2) Check the registration deadline and eligibility. 3) Choose a competition, workshop, performance, volunteering role or audience pass. 4) Complete registration using the official form. 5) Save confirmation and follow event-specific instructions. 6) Verify accommodation, travel, campus access and guest policies before visiting.

Volunteer roles can include logistics, hospitality, publicity, sponsorship, design, content, stage management, technical support, registration, photography and event operations. Availability and selection are organiser-specific.

9. Frequently asked questions

Q: What is the difference between Avishkar and Culrav?
A: Avishkar is the technical festival, while Culrav is the cultural festival. They may be scheduled close together but have different event tracks and audiences.

Q: Are exact dates the same every year?
A: No. Dates change by edition. Treat published dates as valid only for that edition.

Q: Can students from other colleges participate?
A: Many flagship events welcome external participants, but eligibility is event-specific. Check the registration rules.

Q: How can I join the organising team?
A: Look for official volunteer or organiser recruitment announcements and follow the stated selection process.

Q: Is a fest fee or pass required?
A: It depends on the event and edition. Do not assume all events are free or paid.

10. Sources and chatbot rules

• Culrav–Avishkar event website: https://www.culrav-avishkar.in/ (2025 site lists Avishkar 7–9 December and Culrav 10–12 December).
• Official Student Activity Centre: https://sac.mnnit.ac.in/
• Official MNNIT website: https://mnnit.ac.in/
• Official TPO placement brochure (describes Avishkar, Culrav and Hack36): https://tpo.mnnit.ac.in/tnp/downloads/Placement%20Brochure%20MNNIT-Allahabad_2024.pdf
• Udbhav 3.0 report: Times of India, April 2026.

Recommended metadata: event_name, category, edition_year, start_date, end_date, registration_url, eligibility, source_url, and last_verified_date. Store unknown fields as unknown, not fabricated.

Appendix: Event FAQ intents for the chatbot

Intent: current dates
Answer only from the current edition's official announcement. If no current date is published, say that the date has not been confirmed in the available source and direct the user to the official event page.

Intent: registration and eligibility
Explain that registration windows, fees, team size, eligibility, rules and external-college participation are event-specific. Ask which event and edition the user means if that context is missing.

Intent: volunteering
Suggest checking official organiser/volunteer announcements. Do not claim that a particular role is open or that a student has been selected unless a current notice supports it.

Intent: travel and campus access
Tell visitors to verify the venue, entry instructions, guest policy, accommodation availability and reporting time with the organisers. Do not assume a public festival event guarantees unrestricted campus access.

Intent: prizes, performers or sponsors
These details can change each edition. Quote a prize amount, headliner, sponsor or schedule only when the current event source explicitly lists it.

Suggested event record schema

Field	Purpose
event_name / category	Identify the festival and whether it is technical, cultural, sports or entrepreneurship-focused.
edition_year	Prevents historical details from being mistaken for current facts.
start_date / end_date	Use official dates only; otherwise leave unknown.
event_schedule_url	Direct link to the current programme.
registration_url / deadline	Official form and cutoff, if announced.
eligibility / team_size	Rules for participants and teams.
fee / entry_policy	Only when confirmed by the current edition.
source_url / last_verified_date	Evidence and freshness tracking.

Source reminder: the official Culrav–Avishkar website provides edition-specific dates and programme details; the SAC and institute websites are the authoritative starting points for campus activities. Historical dates are context, not a promise of future scheduling.
